

# FilmArray® GI Control Panel M238

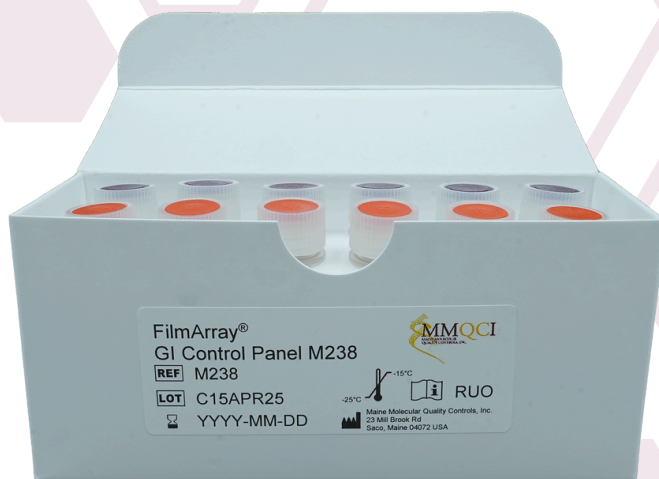

## Helping Clinicians Improve Patient Care

Laboratories using the BIOFIRE® systems now have the opportunity to choose between an 11-target or a 22-target panel when testing for the most common bacteria, viruses, and parasites associated with gastroenteritis. By providing controls that are reliable and consistent, we empower clinicians to trust the accuracy of the results and make timely, informed treatment decisions to improve patient outcomes.

### COMPATIBLE WITH BOTH BIOFIRE GI ASSAYS

- ✓ **BIOFIRE FILMARRAY Gastrointestinal (GI) Panel**
- ✓ **BIOFIRE FILMARRAY Gastrointestinal (GI) Panel Mid**

#### **Multiplex:**

Monitor the detection of all pathogens included in the assay

#### **Ready to use:**

Use as provided. No reconstitution, pooling, or dilution needed

#### **Safe to handle:**

Does not contain any biological material from human or animal origin
