## Quality Controls for Molecular Testing

P/N:	Product Name	Size
<b>Controls for Inherited Disease Testing:</b>		
<b>Cystic Fibrosis</b>		
G106ac-1	INTROL <sup>®</sup> CF Panel I Control v.02	3 x 1mL
G106ac	INTROL <sup>®</sup> CF Panel I Control v.02	3 x 2mL
G110-1	INTROL <sup>®</sup> CF Panel II Control	3 x 1mL
G110	INTROL <sup>®</sup> CF Panel II Control	3 x 2mL
G115-1	INTROL <sup>®</sup> CF Panel III Control	4 x 1mL
G115	INTROL <sup>®</sup> CF Panel III Control	4 x 2mL
G211v1.1	NGS CF Control Panel G211 v1.1	6 x 50µL
<b>Thrombosis</b>		
G108-2H	Xpert FII & FV HET	2 x 0.5mL
G109	Xpert FII & FV Genotype Panel G109	4 x 0.5mL
G11601	Xpert FII & FV NOR/MUT Control	4 x 0.5mL
G123-1	INTROL <sup>®</sup> Thrombosis Genotype Panel	3 x 1mL
G123-2	INTROL <sup>®</sup> Thrombosis Genotype Panel	3 x 2mL
<b>Controls for Oncology Testing:</b>		
<b>BCR-ABL</b>		
C130	Xpert BCR-ABL IS Panel C130	12 x 4 mL
C13112-5	Xpert BCR-ABL 0%IS	5 x 4 mL
C183	INTROL <sup>®</sup> BCR-ABL1 p190 Control Panel	10 x 4 mL
<b>NPM1</b>		
C194	Xpert NPM1 Control Panel C194	10 x 4 mL

MMQCI's multiplex quality controls are uniquely designed to process through the entire molecular testing process, including the extraction, amplification, and detection steps. Routine use provides labs with more confidence in test results by detecting immediate errors, and shifts or trends caused by changes in the environment and test system components.

---

MMQCI products are 100% safe, nonhazardous, robust and stable!
